Examiner Melanie Torres	3683	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election of Group I in the reply filed on January 5, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 14-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group, there being no allowable generic or linking claim.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-13 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Hopey (US 5,927,740).

Re claims 1-13 and 18, Hopey discloses a damping device comprising first and second inner parts (803, 825), which are designed to assume a united position in which the parts are rotatable in relation to one another in order to assume different reciprocal torsional positions, and an outer part (807) designed to entirely or partially enclose the inner parts in their united position, wherein the inner parts comprise sections, the outer

surfaces of which extend partially along a circular cross-section through the inner parts, wherein the inner parts are designed so that in the said united position they form, together with an inner surface of the outer part, first and second spaces (871, 873) of sizes that vary as a function of the torsional positions, wherein said spaces are or can be connected to one another by one or more connections (829) and wherein the spaces are designed to enclose one or more media, which are or can be transferred via the connection or connections as a function of variations in the sizes of the spaces.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hopey , '637 teaches a damping device comprising first and second inner parts which extend partially along a circular cross-section.
